3) **Measuring Gender Equality** (Discussion Summary). This document is a summary of the e-discussion between BRIDGE and UNDP to contribute to the BRIDGE Gender and Indicators Cutting Edge Pack, July 2007. The e-discussion was structured around the following areas: Using data to bring about changes in gender equality and in programming effectiveness; the need for data analysis; tools and techniques; and, measuring specific topics. Prepared by Justina Demetriades, Annalise Moser and Susan Jolly. In English, Spanish and French versions. Download document [http://www.bridge.ids.ac.uk/reports/Indicators\\_e-discussion\\_consolidated\\_reply.pdf](http://www.bridge.ids.ac.uk/reports/Indicators_e-discussion_consolidated_reply.pdf).

4) **Gender and Indicators, 2007.** What does a world without gender inequality look like? Realising this vision requires inspiring and mobilising social change. But what would indicate we are on the right track - and how will we know when we get there? Gender-sensitive indicators and other measurements of change are critical - for building the case for taking gender (in) equality seriously, for enabling better planning and actions, and for holding institutions accountable for their commitments on gender. By Annalise Moser, BRIDGE Cutting Edge Packs, Institute of Development Studies. In English and French.
